

SetuHaul AI Assistant — Complete 23 Tools Catalog

Authoritative Reference Matrix • Tool Functionality, Underlying Database Schemas, and Triggering Driver Prompts

# & Tool Name	Database Table(s)	Functionality & Operational Logic	3 Example Trigger Prompts
1. get_current_user_context	public.users, drivers, auth.users	Returns authenticated driver profile, role permissions, and active driver_id mapping.	1. "Who am I logged in as?" 2. "Show my driver ID and account details." 3. "Verify my current profile and permissions."
2. get_conversation_memory	Upstash Redis (TTL 24h)	Fetches ephemeral 24h conversation context, recent message turns, and rolling summaries.	1. "What did we talk about earlier?" 2. "Summarize our previous conversation in this thread." 3. "What delay did I mention a few minutes ago?"
3. get_driver_operational_context	shipments, appointments, eta_updates	Fetches comprehensive summary of driver's active loads, appointments, latest ETAs, and facility info.	1. "Give me a summary of my active load." 2. "What is my current operational status?" 3. "Show my current shipment and appointment overview."
4. list_active_shipments	shipments	Returns all active (non-completed) cargo shipments assigned to the driver.	1. "List all my active shipments." 2. "How many shipments do I have right now?" 3. "Show my active loads."
5. get_shipment_details	shipments, facilities	Queries detailed cargo weight, temperature specs, origin, destination, and status for a shipment.	1. "What are the details of shipment SHP1002?" 2. "What cargo am I carrying for SHP-D16-RACE-B?" 3. "Show cargo weight and destination for my shipment."
6. get_latest_eta	eta_updates, v_latest_eta	Fetches the latest declared arrival timestamp, confidence code, and delay status.	1. "What was my original arrival time?" 2. "Show the latest ETA for SHP-D16-RACE-B." 3. "When am I scheduled to arrive?"
7. get_eta_history	eta_updates	Retrieves complete chronological history of all prior declared ETA updates and revisions.	1. "Show the ETA update history for SHP1002." 2. "Has my arrival time been updated previously?" 3. "Give me the revision log of my declared ETAs."
8. get_current_appointment	appointments, appointment_slots, docks	Queries assigned appointment window, dock assignment, status observation, and grace period.	1. "Which dock is assigned for my unload?" 2. "What is my current appointment slot time?" 3. "Show my appointment status for SHP-D16-RACE-B."
9. get_facility_details	facilities	Retrieves destination facility address, operating hours, gate rules, and manager contact details.	1. "What are the operating hours for FAC-JAI-01?" 2. "Give me the facility address and contact number." 3. "Where is facility FAC-GGN-01 located?"
10. get_exception_status	driver_exceptions	Queries open driver exceptions, unresolved delay alerts, and incident records.	1. "Are there any open exceptions on my account?" 2. "Show exception alerts for shipment SHP1002." 3. "Check if my delay logged an exception."

# & Tool Name	Database Table(s)	Functionality & Operational Logic	3 Example Trigger Prompts
11. get_dock_maintenance_alerts	dock_status_events, docks	Queries active dock maintenance outages, repairs, and capacity reduction events at destination facility.	1. "Is Dock D-02 undergoing maintenance?" 2. "Are there any dock outages at FAC-JAI-01?" 3. "Show maintenance alerts for my destination facility."
12. get_vehicle_and_carrier_details	vehicles, vehicle_types, carriers, shipments	Reads assigned truck registration, payload capacity (kg), refrigeration capability, and carrier contact info.	1. "What is my vehicle registration and payload limit?" 2. "Does my truck have refrigeration capability?" 3. "Show my carrier contact details and truck specs."
13. get_gate_and_queue_status	facility_checkins, facilities, docks	Checks yard queue position, arrival state (EARLY / ON_TIME / LATE), and gate check-in timestamp.	1. "What is my yard queue position at the gate?" 2. "Am I marked as early, on-time, or late at check-in?" 3. "Show gate queue status for my arrival."
14. get_facility_rules_and_restrictions	facility_rules, facilities	Reads facility safety policies, gate procedures, PPE rules, speed limits, and check-in grace periods.	1. "What are the safety rules at facility FAC-GGN-01?" 2. "What is the check-in grace period for late arrivals?" 3. "Show PPE requirements and gate policies for this warehouse."
15. report_vehicle_breakdown_or_incident	driver_exceptions, chat_threads	Logs roadside vehicle breakdowns, accidents, or emergencies directly to dispatch and PostgreSQL exception queue.	1. "My truck broke down on the highway." 2. "I got into a minor accident and need to report an incident." 3. "Engine failure near milestone 45, notify dispatch."
16. report_delay_or_update_eta	eta_updates, shipments	Previews and records confirmed revised arrival timestamps (with mandatory confirmation step).	1. "My shipment will be delayed by 40 minutes." 2. "Update ETA for SHP-D16-RACE-B to 19:10." 3. "I am running late due to heavy traffic."
17. find_feasible_slots	appointment_slots, docks, facility_schedules	Searches fresh, scored, non-reserved feasible replacement slot options matching revised ETA and cargo rules.	1. "Find replacement slots for my delayed shipment." 2. "What available dock slots exist for 19:30 arrival?" 3. "Show available unloading slots at FAC-JAI-01."
18. request_slot	appointments, appointment_slots, audit_logs	Requests an exact selected slot from find_feasible_slots, creating a PENDING_CONFIRMATION appointment.	1. "I want to select slot SLT-1930 for my shipment." 2. "Request slot SLT-2000 at Dock D-01." 3. "Book slot SLT-0830 for SHP1002."
19. get_appointment_request_status	appointments, appointment_slots	Checks authoritative status of a prior slot request (Pending / Confirmed / Cancelled / Rejected).	1. "What is the status of my requested slot?" 2. "Has my appointment request been confirmed by warehouse?" 3. "Check status of appointment request for SHP-D16-RACE-B."
20. cancel_appointment	appointments, appointment_slots	Cancels an active appointment upon explicit driver request, releasing the slot for fresh searches.	1. "Cancel my appointment APT-0892." 2. "I need to cancel my unloading slot for SHP1002." 3. "Cancel my current dock appointment due to breakdown."
21. reschedule_appointment	appointments, appointment_slots	Replaces an active appointment with an explicitly selected replacement slot option (revalidates capacity).	1. "Reschedule my appointment APT-1002 to slot SLT-2100." 2. "Change my dock slot from 08:00 to 09:30." 3. "Reschedule SHP-D16-RACE-B appointment to slot SLT-1945."

# & Tool Name	Database Table(s)	Functionality & Operational Logic	3 Example Trigger Prompts
22. escalate_exception	escalation_queue, driver_exceptions	Escalates unresolved scheduling/capacity conflicts or NO_FEASIBLE_SLOTS results to human operations.	1. "Escalate this delay to human operations." 2. "No slots available, please transfer my request to dispatch." 3. "Create an operational escalation for SHP-D16-NOSLOT."
23. scheduling_capability_disabled	None (Fallback Guard)	Returns CAPABILITY_NOT_ENABLED fallback guard for unauthorized or restricted mutation requests.	1. "Confirm my appointment without asking dispatch." 2. "Bypass warehouse confirmation." 3. "Force confirm dock slot."
